

## HYDRAULIC BOLT TENSIONING

### Jenbacher Engine Tool Set

Engine Manufacturer	GE Jenbacher
Model(s)	616 620
Application(s)	Cylinder Head Studs

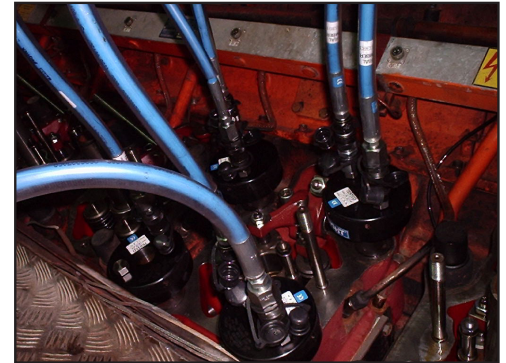

With the Boltight hydraulic tensioning system, engine bolts can be tensioned quickly and accurately. The tools, which are lightweight, durable and simple to use, feature the latest technology and incorporate composite seals that ensure easy piston retraction, long life operation and ease of maintenance. They are designed with an overstroke safety device and maximum stroke indicator for additional safety.

The Jenbacher engine tool set is used to simultaneously tension up to four studs. The compression between the engine components is evenly distributed due to the uniform stud loading. The downtime and risk of engine failure are reduced.

Tools, ancillaries and a full colour health & safety, operating and maintenance manual are supplied in a transportable storage box.

Item	Description	Part Number	Qty.
1	M30 x 2 Hydraulic Tensioner	TDF-M030-08-00	4
2	Hand Pump	BT-1014	1
3	1.5m Flexible Hose (N-C)	BT-1040-1.5	3
4	3m Flexible Hose (N-C)	BT-1040-3	1
5	Ø8mm Tommy Bar	BT-TB-8	2
6	Manual	-	1
7	Storage Box	Jenbacher-01-TS-BOX	1
